Solgar

Solgar Vitamin and Herb is committed to developing and manufacturing the highest quality food supplements worldwide.

The Solgar gold label range is available from health food stores all over the world including the USA, UK, Europe, Middle East, Far East, Africa, Australasia and South America.

nearest stockist is:

Boots HerbalStores

All products are available from www.solgar.co.uk

Solgar

Every supplement we make is a quality statement.

At Solgar, quality has always been our guiding principle. From ingredients to manufacturing to packaging, quality is what we're most known for, and it has made us a leader in the nutritional supplement industry.

We produce our natural products according to the strictest standards that, in many cases, are much more stringent than the authorities require.

We insist that our products pass uncompromising quality control tests. Our VM75 multivitamin, for example, must pass over a hundred tests before it meets our approval.

To ensure that we start with the best possible raw materials, we use the rigorous 'square root' method to sample our natural ingredients – a stringent pharmaceutical technique that's rarely used in the vitamin industry.

To ensure maximum potency, we weigh our products to standards more than twice as stringent as the authorities require.

For the highest possible purity, we prepare our products in isolated rooms, to prevent cross-contamination.

Even our packaging is of the highest possible quality. We use amber and green glass bottles to maintain the potency of our supplements. We don't use plastic bottles so our packaging has less impact on the environment too.

Since high quality nutritional supplements shouldn't cause allergic reactions, we strive to eliminate as many allergens from our formulas as possible. Almost all Solgar products are free from sugar, salt, starch, yeast, corn, wheat, gluten and dairy products and contain no preservatives, artificial flavours or colours.

Our commitment to quality doesn't end when the vitamins meet the bottles. We distribute our products with equal attention to quality and detail. For example, by manufacturing our own supplements, we can control our inventories and ensure our products are always fresh. You'll find the Solgar range only where fine health products are sold; so our customers receive not only the best products, but also the best information about them.

These are just a few examples of our commitment to quality and to making the best nutritional supplements we can. These are just a few reasons why, to millions of health-conscious consumers around the world, the Solgar Gold Label symbolises excellence.

KEY TO SYMBOLS

- ★ New products now available.
- ∇ Two-piece vegetarian capsules.
- ⊗ Temporarily unavailable.
- * Amino acid chelated minerals, Albion Process Patent.
- † Rebranded products.
- (S.F.P.) Standardised Full Potency – a range of herbals each comprising two important parts: standardised herbal extract plus whole raw herb. Standardisation always results in a reliable, repeatable amount of the active constituents. A standardised extract guarantees a consistent amount of the key herbal compounds.
All Solgar S.F.P. herbs contain Solgar's exclusive PhytO₂X[®] System, a special blend of antioxidants contained in each Vegetable Capsule, including: carotenoids and vitamin C. PhytO₂X[®] helps maintain the freshness of the herbs and their active constituents by preventing oxidation.
- (F.P.) Full Potency - Solgar's unique Full Potency herbs provide traditional herbal extracts in a base of the active raw herbs.

This price list is printed on 100% recycled paper 

All prices and stock availability correct at 1st June 2009.

All details correct at time of going to press.
